Vol. 110 THERMOCHIMICA ACTA February 1st, 1987

CONTENTS

(Abstracted/Indexed in: Curr. Contents: Phys., Chem. Earth Sci.; Eng., Technol. Appl. Sci., Chem. Abstr.)

THERMAL ANALYSIS HIGHLIGHTS 1985—A Selection of Key Lectures, Workshops and other Unpublished Reports Presented at the 8th International Conference on Thermal Analysis, Bratislava, Czechoslovakia, 19–23 August 1985

Preface vii

Introduction ix

Some reflections on thermal analysis
R.C. Mackenzie (Aberdeen, Gt. Britain) 1

Information flood: fiction and reality
J. Fiala (Plzeň, Czechoslovakia) 11

Report on the workshop: education, publication and standardization in thermal analysis
W. Ludwig (Jena, G.D.R.) and S.St.J. Warne (Shortland, N.S.W., Australia) 23

Report on the workshop: advances in thermoanalytical instrumentation
C.B. Murphy (Fairport, NY, U.S.A.) and K. Habersberger (Prague, Czechoslovakia) 31

Trends in thermal analysis instrumentation
D. Schultze (Berlin-Adlershof, G.D.R.) 51

Instrumentation in thermal analysis: progress report
J. Hakl (Allschwil, Switzerland) 57

On the less-common thermal analysis techniques
L. Stoch (Kraków, Poland) and E. Kaisersberger (Selb, F.R.G.) 61

Report on the workshop: the use of computers and data storage in everyday thermoanalytical practice
B. Wunderlich (Troy, NY, U.S.A.) and P. Fellner (Bratislava, Czechoslovakia) 67

Processing of thermoanalytical curves and exact use of thermal analysis
P. Holba (Prague, Czechoslovakia) 81

Methodology of studying reaction kinetics by thermal analysis
J. Kříž and J. Šesták (Prague, Czechoslovakia) 87

Reaction kinetics in thermal analysis: a brief survey of fundamental research problems
G. Várhegyi (Budapest, Hungary) 95

Report on the workshop: current problems of kinetic data reliability evaluated by thermal analysis
J.H. Flynn (Washington, DC, U.S.A.), M. Brown (Grahamstown, South Africa) and J. Šesták (Prague, Czechoslovakia) 101

Comparison of crystallization kinetics determined by isothermal and non-isothermal methods
T. Kemény (Budapest, Hungary) and J. Šesták (Prague, Czechoslovakia) 113

The evaluation of kinetic parameters from non-isothermal experiments
T. Kemény (Budapest, Hungary) 131

The rate law of *n*th-order in thermal analysis
E. Koch (Mulheim Ruhr, F.R.G.) 135

Introduction and critique of non-isothermal kinetics
P.D. Garn (Akron, OH, U.S.A.) 141

How (un)reliable are kinetic data of reversible solid-state decomposition processes?
M. Maciejewski (Warsaw, Poland) and A. Reller (Zürich, Switzerland) 145

Quantitative thermoanalytical studies of the kinetics and mechanisms of the thermal decomposition of inorganic solids
M.E. Brown (Grahamstown, South Africa) 153

(Continued on p. 3 of cover)

(Contents continued)

Some macrokinetic structural aspects of heterogeneous thermal dissociation reactions
V.A. Logvinenko (Novosibirsk, U.S.S.R.) 159
Outline of some new calorimetric techniques and instrumentation
J. Brandštetr (Gorkého, Czechoslovakia) 165
Thermokinetics by heat-conduction calorimetry
H. Tachoire (Marseille, France) and V. Torra (Palma de Mallorca, Spain) 171
Low-temperature calorimetry: a particular branch of thermal analysis
E. Gmelin (Stuttgart, F.R.G.) 183
Trends in the methods of measurement of thermophysical properties in the solid state
Ľ. Kubičár (Bratislava, Czechoslovakia) 209
Thermodynamics and phase diagrams
H.J. Seifert (Kassel, F.R.G.) 217
Report on the workshop: potential of non-traditional thermal analysis methods
V. Balek (Řež, Czechoslovakia) and J. Rouquerol (Marseille, France) 221
Emanation thermal analysis used to study annealing of radiation disorder
Č. Jech (Prague, Czechoslovakia) 237
Correlation between surface area and emanation power of solids
K. Habersberger (Prague, Czechoslovakia) and V. Balek (Řež, Czechoslovakia) 241
Recent developments in the theory of emanation thermal analysis
J. Kříž (Prague, Czechoslovakia) and V. Balek (Řež, Czechoslovakia) 245
Thermosonimetry
K. Lønvik (Trondheim, Norway) 253
Some applications of the decrepitation technique and thermosonimetry in research on minerals and building materials
V. Lach (Brno, Czechoslovakia) 265
Thermomagnetometry
S.St.J. Warne (Shortland, N.S.W., Australia) and P.K. Gallagher (Murray Hill, NJ, U.S.A.) .. 269
Thermoelectrical conductivity of $Ge_{20}Bi_{15}S_{65}$ as a complementary method to differential thermal analysis
J. Málek, J. Klikorka (Pardubice, Czechoslovakia), J. Šesták and A. Tříska (Prague, Czechoslovakia) 281

(Continued on facing page)

GENERAL INFORMATION

Submission of articles: Manuscripts should be submitted to Prof. W.W. Wendlandt, Department of Chemistry, University of Houston, Cullen Boulevard, Houston, Texas 77004, U.S.A. A notice to authors may be obtained through the Editor-in-chief or the publisher.
Submission of an article is understood to imply that the article is original and unpublished and is not being considered for publication elsewhere.
Upon acceptance of an article by the journal, the author(s) will be asked to transfer the copyright of the article to the publisher. The transfer will ensure the widest possible dissemination of information.

Languages: Papers in English, French or German will be accepted, but English is preferred. When normal-length papers are written in French or German, an English abstract should be added. A Résumé or Zusammenfassung, in the same language as the paper itself, should also be added.

Reprints: A total of 50 reprints of each paper will be provided free of charge to the author. Additional copies can be ordered at prices shown on the reprint order form which will accompany the proofs.

Customers in the U.S.A. and Canada who wish to obtain information on this and other Elsevier journals, can contact the Journal Information Center, Elsevier Science Publishing Co. Inc., 52 Vanderbilt Avenue, New York, NY 10017, U.S.A., Tel: (212) 916 1250.

Subscriptions should be sent to:

ELSEVIER SCIENCE PUBLISHERS B.V.,
Journals Department, P.O. Box 211, 1000 AE Amsterdam, The Netherlands, Tel: 5803 911, Telex: 18582

(*Contents continued*)

Use of low- and high-power microwave energy for thermal analysis
E. Karmazsin (Villeurbanne, France) 289
E.m.f. measurements on solid electrolytes—a tool for investigating systems with alkali metal chlorides
H.J. Seifert (Kassel, F.R.G.) 297
Mechanochemistry of inorganic solids
V.V. Boldyrev (Novosibirsk, U.S.S.R.) 303
Thermal effects induced by imperfections in powdered solids
J. Morales and J.L. Tirado (Córdoba, Spain) 319
Microdynamics of solid-state reactions
Z.G. Szabó (Budapest, Hungary) 325
Bond length–bond energy concept and its impact on the surface chemistry of oxides
J. Ziółkowski (Kraków, Poland) 333
Thermoanalytical investigation of zeolites and related compounds
K. Habersberger (Prague, Czechoslovakia) 337
Study of the thermal preparation and stability of tetrametaphosphates of bivalent metals
M. Trojan, D. Brandová and Z. Šolc (Pardubice, Czechoslovakia) 343
Significance of structural factors in the thermal dissociation of solids
L. Stoch (Kraków, Poland) 359
Some aspects of heterogeneous reactions of inorganic solids
M. Taniguchi (Tokyo, Japan) 367
Decomposition of inorganic compounds
N.K. Kaushik (Delhi, India) 373
Thermal analysis in inorganic chemistry: progress report
P. Bukovec (Ljubljana, Yugoslavia) 383
Inorganic complexes
A. Sopková (Košice, Czechoslovakia) 389
Report on the workshop: thermal characterization of non-stoichiometric oxides and similar compounds and their application in energy storage and conversion
O.T. Sørensen (Roskilde, Denmark) and D. Jakeš (Řež, Czechoslovakia) 395
Thermal analysis applied to electronic materials and processes
P.K. Gallagher and H.E. Bair (Murray Hill, NJ, U.S.A.) 407
Thermal analysis of glass
K. Heide (Jena, G.D.R.) 419
Role of thermal annealing during processing of metallic glasses
J. Šesták (Prague, Czechoslovakia) 427
Possibilities of emanation thermal analysis for the characterization of semiconducting glasses
V. Balek (Řež, Czechoslovakia) and S. Bordas (Bellaterra, Spain) 437
Acid–base concept in oxide glasses
M.M. Shultz, N.M. Vedishcheva and B.A. Shakhmatkin (Leningrad, U.S.S.R.) 443
Progress in the thermal analysis of oxides and refractories
O.T. Sørensen (Roskilde, Denmark) 449
Thermal characterization and reactivity of metal oxide powders by emanation thermal analysis using Ra-226 parent isotope
T. Ishii (Sapporo, Japan) 453
Application of high-temperature thermal methods to the investigation of refractory and related materials
M. Potančok (Trenčín, Czechoslovakia) 459
Thermal analysis and chemistry of inorganic binders
V. Šatava (Prague, Czechoslovakia) and V. Lach (Brno, Czechoslovakia) 467
Thermal analysis in the cellulose, paper and textile industry
E. Karmazsin (Villeurbanne, France) 471

(Continued overleaf)

(Contents continued)

Themochemistry of polymers
Yu.N. Sazanov (Leningrad, U.S.S.R.) 477
Thermal analysis in earth sciences
W. Eysel (Heidelberg, F.R.G.) 495
Applications of thermal analysis to carbonate mineralogy
S.St.J. Warne (Shortland, N.S.W., Australia) 501
Water–solid interactions in thermal analysis
S. Yariv (Jerusalem, Israel) and S. Shoval (Tel-Aviv, Israel) 513
Thermal analysis of zeolites
A. Dyer (Salford, Gt. Britain) 521
Coal characterisation by thermal analysis
A. de Korányi (London, Gt. Britain) 527
Scientific and social activities of the Eighth International Conference on Thermal Analysis, Bratislava, 19–23 August 1985, Czechoslovakia 535
Pioneers of thermal analysis in Czechoslovakia
M. Nevřiva, J. Rosický (Prague, Czechoslovakia), I. Proks and E. Kanclíř (Bratislava, Czechoslovakia) 553
